Dear Mr Daa Rizk,

2nd MIPS Laparoscopic Course – Laparoscopic Sacrocolpopexy Workshop on Pelvitainers was a great success! We had 11 participants, who enjoyed our lectures and training on pelvitainers. We gave participants theoretical and practical knowledge, and especially, the hands-on training on prepared tissues that stimulated sacrocolpopexy.

Our workshop would not be that successful without our sponsors, companies Karl Storz, Astellas and Medip. I also would love to thank you for all your support!

I am looking forward to seeing you soon

Adolf Lukanović with the organizing team
